

FieldTurf Is Football

The #1 Choice Of Football

FieldTurf's safety, performance and durability levels are far superior to any other system. As the world's largest synthetic turf company, FieldTurf is installed in most major stadiums. But there is no difference between a high profile FieldTurf field and one installed in a small town. For every pro or college field we build, we install the same quality field at 150 high schools and municipalities.

Testimonials

21 of 32 NFL teams have chosen to play/practice on FieldTurf

"I like it (FieldTurf) a lot...just because the footing is so good and you can really push off and drive the ball, and the receivers can cut really well. I think everybody really likes the surface."

– **Tom Brady**
New England Patriots Quarterback

100+ NCAA football programs have FieldTurf

"When we selected the field for TCF Bank Stadium, our goal was to install the best possible playing surface for our student-athletes."

– **Joel Maturi**
University of Minnesota Athletic Director

1000s of high school and municipal sports installations

"I spoke to numerous athletic directors and I obtained a lot of input from our players. The durability of the field, along with the reliability and workmanship of the company has confirmed that the FieldTurf system is the best product available."

– **Brad Turner**
Springtown ISD Athletic Director

New England Patriots - Foxborough, MA

Ohio State Buckeyes - Columbus, OH

Concussions

Head injuries, especially concussions, particularly in the game of football, have become a subject of deep concern, much study and even Congressional hearings in the United States. FieldTurf is the ONLY artificial turf system that has PROVEN to yield less concussions, neural injuries and cranial/cervical injuries when compared to the best of natural grass surfaces through long-term real-life data.

Performance Enhancing Artificial Turf

FieldTurf's Performance Enhancing Artificial Turf provides a surface that allows athletes to focus on skill and execution. The patented turf system is preferred over all others at the highest levels of sport.

Maximum safety and performance

FieldTurf, the world leader in artificial turf, has mastered the science of safety and performance by engineering a sports surface that caters to ideal levels of impact absorption, rapid deceleration and energy restitution. For the artificial turf industry, those ideal levels are measured as the field's G-max rating, a quantifiable indication of the field's degree of hardness and ability to absorb impact.

NFL Combine

In addition to its renowned safety benefits, the FieldTurf system has gained a reputation across the industry for its high performance and speed.

- At the 2008 NFL Combine, Chris Johnson ran a record 4.24 40-time on FieldTurf
- Since 2000, nine of the fastest twelve times at the NFL Combine have been on FieldTurf

2010 NFLPA Survey Results

Every two years, the NFL Players Association conducts a survey of its players where all of the league's playing surfaces are rated and ranked on many performance-based factors. In 2010, the NFL Players voted FieldTurf as the best artificial surface in the league. – for the 10th year in a row! A total of 1619 active NFL players from all 32 teams completed survey forms.

1. Indianapolis (FieldTurf)
2. New York Giants/Jets (FieldTurf)
4. Seattle (FieldTurf)
6. Atlanta (FieldTurf)
7. New England (FieldTurf)
8. Detroit (FieldTurf)
10. Cincinnati (FieldTurf)

Players perform with more confidence on FieldTurf because it is not only a safer surface but also the most consistent, stable and athlete-friendly artificial turf system in the world.
